	Application No.	Applicant(s)					
		LIGGETT, STEPHEN B.					
Office Action Summary	09/936,499						
Office Action Summary	Examiner	Art Unit					
The MAU INC DATE of this communication and	Jeanine A Goldberg	1634					
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status							
1) Responsive to communication(s) filed on 17 L	December 2001 .						
·	is action is non-final.						
3) Since this application is in condition for allowa	ance except for formal matte	ers, prosecution as to the merits is					
closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213. Disposition of Claims							
4)⊠ Claim(s) <u>1-21,23,26 and 27</u> is/are pending in the application.							
4a) Of the above claim(s) is/are withdrawn from consideration.							
5) Claim(s) is/are allowed.							
6) Claim(s) is/are rejected.							
7) Claim(s) is/are objected to.							
8) Claim(s) 1-21,23,26 and 27 are subject to restriction and/or election requirement.							
Application Papers							
9) The specification is objected to by the Examiner.							
10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner.							
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).							
11) The proposed drawing correction filed on is: a) approved b) disapproved by the Examiner.							
If approved, corrected drawings are required in reply to this Office action.							
12) The oath or declaration is objected to by the Examiner.							
Priority under 35 U.S.C. §§ 119 and 120							
13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).							
a) All b) Some * c) None of:							
1. Certified copies of the priority documents have been received.							
2. Certified copies of the priority documents have been received in Application No							
3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.							
14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).							
a) ☐ The translation of the foreign language pro 15)☐ Acknowledgment is made of a claim for domes							
Attachment(s)							
1) Notice of References Cited (PTO-892) 2) Notice of Draftsperson's Patent Drawing Review (PTO-948) 3) Information Disclosure Statement(s) (PTO-1449) Paper No(s)	5) Notice of Ir	nummary (PTO-413) Paper No(s) Informal Patent Application (PTO-152) .

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to a method for predicting an individual's bronchodialating response to an agonist of beta2AR by determining the genotype of +491PS.

Group II, claim(s) 6-10, drawn to a method for predicting a patient's bronchodilating response to an agonist of beta2AR by assaying a sample for expression of the Ile164 beta2AR.

Group III, claim(s) 11-14, drawn to a method for treating a patient suffering from asthma or COPD.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

According to PCT Rule 13.2, unity of invention exists only when there is a shared same or corresponding special technical feature is a contribution over the prior art. The inventions listed in Group I do not relate to a single general inventive concept because the lack of the same or corresponding special technical feature. The technical feature of Group I is determining the individuals genotype at the +491PS" which is shown by

Application/Control Number: 09/936,499

Art Unit: 1634

Liggett (US Pat. 6,498,009) to lack novelty or inventive step and does not make it a contribution over the prior art.

According to PCT Rule 13.2, unity of invention exists only when the shared same or corresponding technical feature among the claimed inventions. All the groupings are directed to predicting a pateint's bronchodialitng response to an agonist of beta2AR but each group has a different special technical feature not shared by the remaining groups. Group I is directed to a nucleic acid detection method which has the special technical feature of the beta2AR gene not shared by any of the remaining groups. Group II is directed to a protein expression assay which has the special technical feature of a protein variant not shared by any of the remaining groups. Finally Group III is directed to a method of treating a patient suffering from asthma or COPD using various treatments.

Each of the claimed methods is patentably distinct from the other because they involve different method steps and have different objectives. The methods of invention 1 require steps of determining the genotype for +491PS in the beta2AR gene to achieve the objective of predicting an individual's bronchodilating response to an agonist of beta2AR gene. The methods of invention II require analyzing the amino acid sequence of the beta2AR gene in order to accomplish the objective of predicting an individual's bronchodilating response to an agonist of beta2AR gene. The methods of invention III require identifying the nucleotide sequence at position +491 in order to achieve the objective of treating a patient suffering from asthma or COPD.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Jeanine Goldberg whose telephone number is (703) 306-5817. The examiner can normally be reached Monday-Friday from 8:00 a.m. to 5:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Jones, can be reached on (703) 308-1152. The fax number for this

Group is (703) 305-3014.

Any inquiry of a general nature should be directed to the Group receptionist whose telephone number is (703) 308-0196.
